

Title: FUNDAMENTALS OF FIELD CRAFT AND DESCRIPTION OF GROUND

National Cadet Corps (NCC) â Official Directorate General Training Notes

1. DEFINITION OF FIELD CRAFT: Field Craft is the specialized military art of utilizing natural ground features, weapon characteristics, and personal tactical skills to locate, outmaneuver, and neutralize enemy forces without being detected.

2. SUB-DIVISIONS OF FIELD CRAFT: Comprises Description of Ground, Judging Distance, Recognition of Targets, Camouflage and Concealment, and Tactical Movement with and without arms.

3. GROUND CLASSIFICATION: 1. Broken Ground (uneven, providing ample dead space and natural cover); 2. Flat Open Ground (dangerous, offering no concealment); 3. High Ground (provides superior tactical observation and dominant fields of fire); 4. Dead Ground (ground hidden from observer direct view due to terrain convexity).

4. DIVISION OF GROUND INTO ZONES: For descriptive orders, ground is split into Foreground (up to 300m), Middle Distance (300m to 500m), and Background (beyond 500m).
