

Title: CAMOUFLAGE AND CONCEALMENT PRINCIPLES

National Cadet Corps (NCC) â Official Directorate General Training Notes

1. PRINCIPLES OF CAMOUFLAGE: Camouflage is the artificial disguise applied to personnel, weapons, and equipment to blend seamlessly with surrounding natural terrain.

2. TYPES OF COVER: Cover from View (conceals from enemy observation but does not stop high-velocity bullets, e.g. tall grass, bush); Cover from Fire (protects against enemy bullet penetration and artillery splinters, e.g. thick rock walls, sandbagged trenches, earthen embankments).

3. PERSONAL CAMOUFLAGE TECHNIQUES: 1. Helmet garnishing with local vegetation matched to terrain; 2. Face and skin disruption using camouflage cream or mud to break facial shine and natural highlights (nose, cheekbones); 3. Wrapping rifle furniture in burlap/scrim to break the dark weapon silhouette.

4. DISCIPLINE OF CONCEALMENT: Avoid sudden movements, do not look over the top of a parapet when you can observe around its side, and avoid breaking the skyline.
