

Title: FIRE AND MOVEMENT TACTICS AND FIELD RUSHES

National Cadet Corps (NCC) â Official Directorate General Training Notes

1. BASIC FIRE AND MANEUVER PRINCIPLE: When advancing in the face of enemy fire, one group (the Fire Element) provides sustained suppressing fire while the other group (the Maneuver Element) rushes forward to close the distance.
2. THE 3 TO 5 SECOND SHORT RUSH: Troops never run continuously under fire. Rushes are restricted to 3 to 5 secondsâ the exact time required for an enemy rifleman to aim and fire.
3. RUSH MNEMONIC SEQUENCE: "I am up, he has seen me, I am down" followed by an immediate low crawl to fresh cover before observing and engaging.
4. CRAWLING TECHNIQUES: The Monkey Crawl (moving on hands and knees keeping the rifle cradled across arms) for medium cover; The Leopard/Ghost Crawl (crawling flat on the stomach using elbows and toes) for minimal ground depressions.
