

Title: GRID SYSTEMS AND FOUR & SIX FIGURE GRID REFERENCES

National Cadet Corps (NCC) â Official Directorate General Training Notes

1. **PURPOSE OF MILITARY GRID SYSTEM:** The Purple Grid network drawn across survey maps enables troops to designate any point on earth accurately without relying on complex geographical latitude and longitude coordinates.

2. **EASTINGS & NORTHINGS:** Eastings are the vertical grid lines numbered sequentially from West to East (left to right). Northings are the horizontal grid lines numbered sequentially from South to North (bottom to top). The fundamental reading rule is: "Along the corridor first (Eastings), then up the stairs (Northings)".

3. **4-FIGURE GRID REFERENCE:** Identifies a 1 square kilometer grid box. Example: Easting line 42 and Northing line 68 yield the 4-figure reference GR 4268.

4. **6-FIGURE GRID REFERENCE DECOMPOSITION:** Divides each 1 km grid square into tenths (100-meter precision). To locate a bunker at 3 tenths east of line 42 and 7 tenths north of line 68, the full 6-figure reference is written as GR 423687 (Easting 42 + 3, Northing 68 + 7).
